### Challenge

Increase the level of automation and the proportion of smart technologies within production.

### Solution

Joint development of a completely connected production line for robot gears.

### Result

„We decided for the cooperation with Bosch Rexroth, because we not only wanted to buy single components, but also realize the complete project together with a partner.”

Xingyuan Long, CEO QCMT&T

### Solved with

- ▶ CNC control IndraMotion MTX
- ▶ Nexo intelligent cordless nutrunner
- ▶ ActiveCockpit
