

# Fast and Precise Top-Loading

R.WEISS, situated in Crailsheim, Germany, is a manufacturer of reliable machines and components and also offers planning, customer-specific solutions and flexible installation services. The top-loading machine UNIROB can handle approximately 900 products per minute and is part of a complete secondary packaging solution. Linear modules by Rexroth are used for high-precision positioning.

## Solution

- ▶ **Omega module with ball rail system OBB** for increased dynamics with bigger loads on longer travel paths
- ▶ **Linear modules with ball rail systems and ball screw MKK** for high load ratings and high positioning and repetition accuracy

Application live in hall 16,  
stand D37-1

## Tough Application

A highly flexible top-loading machine, which can be used in many different industries

## Ingenious Solution

UNIROB top-loading area with delta robots connected in series, use of linear and omega modules

## Exactly

*“The linear modules by Rexroth and the professional support are very valuable to us.”*

Siegfried Schust,  
Sales Director
